Tariff Summary

All figures shown are in HK\$

Port Charge (10BaseT)	Standard Monthly Service Fee (HK\$ per port)	Connection / External removal (HK\$ per port)	Internal removal (HK\$ per port)
10 Mbps Port	2,604	4,200	2,100
10 Mbps Port (Back-up)	1,823	4,200	2,100
Per 1Mbps Bandwidth Allocation	523	-	-
Port Charge (10BaseT)	Standard Monthly Service Fee (HK\$ per port)	Connection / External removal (HK\$ per port)	Internal removal (HK\$ per port)
100 Mbps Port	7,224	12,600	6,300
100 Mbps Port (Back-up)	5,056	12,600	6,300
Per 1Mbps Bandwidth Allocation	250	-	-
Per 5Mbps Bandwidth Allocation	1,250		
Port Charge (1000BaseSX)	Standard Monthly Service Fee (HK\$ per port)	Connection / External removal (HK\$ per port)	Internal removal (HK\$ per port)
1GMbps Port	26,040	31,500	15,750
1GMbps Port (Back-up)	18,228	31,500	15,750
Per 50Mbps Bandwidth Allocation	4,200	-	-
Reconfiguration	One-time (HK\$ per port)		
10 Mbps port	168		
100 Mbps port / 1Gbps port	336		

The above services and tariff are subject to the prevailing General Service Terms and Conditions of HGC Global Communications Limited published from time to time.

Remarks:

- The above charges are per port basis for within 15km apart between 2 customer locations. (1.2 x monthly rental is required for additional 10km distance.)
- The above Connection / External removal cost applies to locations with direct fibre access only. Different charge will apply for removal to locations without direct fibre access.
- The above charges do not include the cost of internal trunking, premises access & sundry; and the cost of additional fibre provision cost, if there is no fibre coverage.
- Customer is required to facilitate HGC Global Communications Limited to provide the service to the installation premise.
- The standard delivery lead time is 8 weeks upon order confirmation which does not include Building Management Office ('BMO') permit application and customer internal facilities. It is subject to the provision feasibility of the installation locations.
- For port upgrade, new ports which support higher bandwidth will be installed to replace the original one, otherwise, the new installation charges have to be paid.
